WIRED

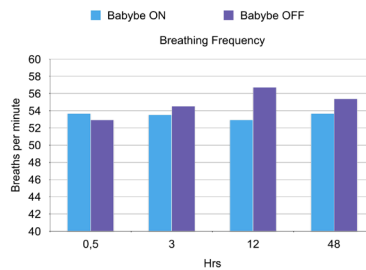

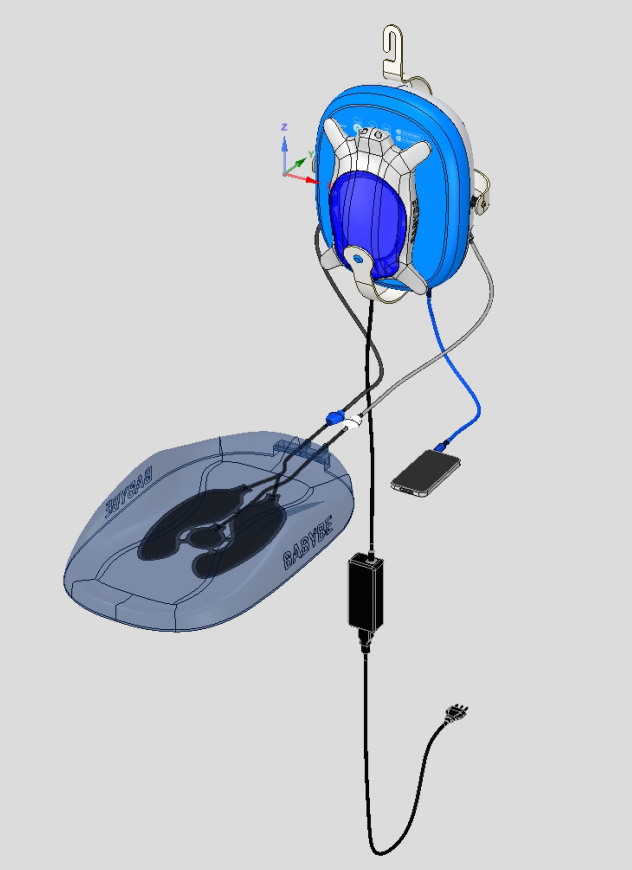

BABYBE[®]
Be with your Baby

“Accelerate patient recovery, increase patient safety and improve physician productivity are the main desired outcomes of value-based purchases in hospitals”¹

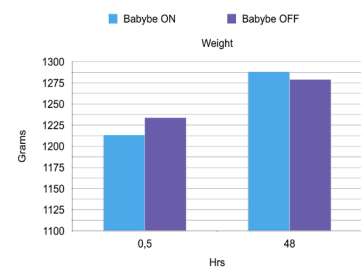

Paul Yock, head of Biodesign program Stanford

Clinical trials shown that by reducing the stress and accelerating the weight gain Babybe can reduce hospital stay and bring mothers and their child sonner together. ²

Results on Breathing frequency

Results on Weight

Babybe benefit Hospital's customers by:

- Getting Babies better faster by Accelerating their weight gain.
- Decreasing stress levels of newborn and their mothers.
- Turning Mothers into active caretakers of their babies.
- Decreasing postpartum depression on Mothers.
- Improving mother-child bonding.

Babybe benefit the hospitals by:

- Saving up to USD\$600,000 per year. ³
- Increase patient rotation.
- Reducing workload of medical staff by soothing babies.
- Capturing new clients by Improving perception of care.
